<sup>2</sup> All media creativity products must be approved by a Web project manager and the editorial team before going live.<sup>3</sup> For RDS we will require responsive ad sizes of 970x90, 960x90, 728x90 and 320x50 for mobile web.

- See [in-banner video](#) file load specifications.
- Expansion of the ad can be initiated by either: click to expand/click to retract.
- Must include "Close X" on expanded panel. (Font: 8-16pt, 11-21px.)
- Video must include play, pause, mute (and/or volume control to 0).
- An open/close button must be available at all times in the right-hand corner:
  - top: 0
  - right: 0
  - width: 100px
  - height: 27px
  - Send two visuals in open/close state, in .SWF format. We will take care of open/close function.

<sup>4</sup> For RDS, add z-index 4 999 for any masthead.

<sup>1</sup>Websites represent desktop and mobile websites  
<sup>2</sup> HTML5 is accepted only when served via approved third party tag  
<sup>3</sup> Sites are not built to support skins on mobile web  
<sup>4</sup> Sympatico sites includes : Sympatico, Envedette, Lookdujour, Muramur, Voyage Voyage, Fraichementpresse, and Actualité  
<sup>5</sup> Chaînes Télé Bell (CTB) includes: CanalD, CanalVie, Investigation and Ztele  
<sup>6</sup> All Third-Party display tags must be secure (https)

If third party is not on above list, tag must be evaluated, tested and approved prior to running. Send request to [AdOperationsSupport@bellmedia.ca](mailto:AdOperationsSupport@bellmedia.ca).

In order to monitor the quality of ad content on our network, Bell Media reserves the right to the following at any time:

- Monitor third party servers for performance and response times.
- Request a list and/or sample page of all creative currently live.
- The ability to require express approval of any creative additions or deletions.

## Data Ownership, Privacy and Laws

Bell Media adheres to the IAB Canada Standard Terms and Conditions regarding use of collected data.

From page 16 XIII. d. i. and ii. of the [IAB Canada Standard Terms and Conditions](#):

*Unless otherwise authorized by Media Company in writing, Advertiser will not: (A) use Collected Data for Repurposing; provided, however, that Performance Data may be used for Repurposing so long as it is not joined with any IO Details or Site Data; (B) disclose IO Details of Media Company or Site Data to any Affiliate or Third Party except as set forth in Section XII(d)(iii).*

*Unless otherwise authorized by Agency or Advertiser, Media Company will not: (A) use or disclose IO Details of Advertiser, Performance Data, or a user's recorded view or click of an Ad, each of the foregoing on a non-Aggregated basis, for Repurposing or any purpose other than performing under the IO, compensating data providers in a way that precludes identification of the Advertiser, or internal reporting or internal analysis; or (B) use or disclose any User Volunteered Data in any manner other than in performing under the IO.*

## Viewability

### Viewability Terms:

- Bell Media will accept viewability tracking from above vendors on CPM campaigns only when appended to [accepted third party tags](#).
- We will continue to deliver and bill the campaign from the contracted CPM as indicated on the insertion order based on Bell Media numbers.
- Any content/keyword flags coded into the viewability tags must be disclosed to Bell Media prior to campaign going live.
- We do not bill off of in-view numbers or guarantee in-view compliance, nor offer make goods based on viewability.
- Viewability tags cannot usher in any other platform or vendor. Bell Media will pause any campaign where this behavior is detected.

## Nielsen Online Campaign Ratings (OCR)

- Bell Media will accept Nielsen OCR on Desktop CPM campaigns only when appended to [accepted third party tags](#).
- We will continue to deliver and bill the campaign from the contracted CPM as indicated on the insertion order based on Bell Media numbers.
- No make goods or cancellations accepted based on OCR reporting.
- Nielsen OCR tags cannot usher in any other platform or vendor. Bell Media will pause any campaign where this behavior is detected.

## Cache-Busting

- Cache-busting is required for all third party served campaigns.
- Placement of cache-busting parameters must be clearly indicated in the ad tag code.
- Third party served click URLs for hard-coded placements (text links, etc.) do not make use of cache-busting.

## Additional Ad Standards & Creative Guidelines

### Adobe Flash Conventions\*

- We accept Flash version 6-10.1 but NOT Flash 11,12 etc.
- Actionscript 2.0 and 3.0 are accepted (clickTAG examples below), IAB Canada recommends AS2 for Flash creative.
- Standard ads should be served as WMODE "Opaque".
- Floating ads should be served as WMODE "Transparent".
- clickTAG is case sensitive and must be formatted "clickTAG" and not "clickTag" or "clicktag"
- Flash is not compatible on iOS operating system, provide backup image

### Proper clickTAG implementation

The clickTAG variable is an industry-standard method of tracking Flash creative clicks; it allows Google to register where an ad was displayed when it was clicked on. Problems with Flash creative may result from an incorrect clickTAG implementation. To troubleshoot this implementation, make sure that:

The advertiser has inserted the clickTAG in the .fla file before converting it to the .swf file that is uploaded to DFP.

The clickTAG variable is properly implemented in the action of the button. In the getUrl() function of the action, make sure to specify the clickthrough URL as clickTAG and the target window as "\_blank". For example: getUrl(clickTAG,"\_blank");

### Actionscript 2 clickTAG example:

```
on (release) {  
  getUrl(clickTAG,"_blank");  
}
```

### Actionscript 3 clickTAG example:

```
Link_1.addEventListener(MouseEvent.CLICK, function(event: MouseEvent):  
  
void { var sURL: String;  
  if ((sURL = root.loaderInfo.parameters.clickTAG)) {  
    navigateToURL(new  
      URLRequest(sURL), "_blank"); }  
}
```

\*Display ads in Flash Format will no longer be supported after March 31. Please provide alternative creative formats for display ads after this date (example .jpg, gif or third-party tag).

## Rich Media Restrictions

- We do not support JAVA (not to be confused with JavaScript) due to security issues, in addition to performance issues and initial load times.
- Ad code using ILayer, Layer or NoLayer tags due to compatibility and stability issues.
- Mailto fields, as we cannot ensure the user will have a consistently good experience using ads with this functionality.

## Creative Notes

- Creative with a white background must have a solid 1-pixel border (black recommended).
- All Rich Media (In-Banner Video, Expandable, Floating, and IAB Rising Stars) must be [third party served](#) and must provide a standard GIF/JPG image backup file.
- Maximum animation and video frame rate is 30 FPS (frames-per-second)
- In-Stream Video ads (i.e. pre-roll video) that are served within a video player environment; should have audio that plays automatically.
- When an ad is clicked it must launch the advertiser's landing page in a new browser window.
- Impression Tracker tags must be secure (HTTPS)

## Bell Media Performance (CPC)
