DAILY PLANET: THEME WEEKS
2017-2018

MONDAY OCTOBER 2 – FRIDAY OCTOBER 6 AT 7P ET

Discovery

Is your heart racing? Are the little hairs on the back of your neck standing at attention? Good. You're living the life of an adrenaline junkie. They're the people who push themselves well past the normal limits. They're the daredevils who smash records, explore the limits of their bodies and throw the rule book out the jet plane when they leap. Daily Planet's Adrenaline Junkies Week will inspire you to get up off the couch and live life to the fullest.

MONDAY NOVEMBER 6 – FRIDAY NOVEMBER 10 AT 7P ET

Discovery

We are firing up machines with million dollar price tags and machines that you'd demand a million dollars to ride! Daily Planet will take you all around the world to see sometimes frightening, sometimes exhilarating, but always extreme machines. You'll be in Bavaria launching a 16-metre-high siege weapon for the very first time, and in Chicago driving the fire department's two-person tiller truck. Helmets on, seatbelts fastened. Let's do this.

MONDAY JANUARY 8 – FRIDAY JANUARY 12 AT 7P ET

Discovery

Daily Planet kicks off 2018 with a bold look at the future. One that isn't years away, but already beating down your door and changing your life in the most remarkable ways. Want proof? We'll head to Vegas and hang out at the 2018 Consumer Electronics Show – aka, CES. It's where future-forward gadgets debut on the world's stage but only Daily Planet takes you behind the scenes with the masterminds responsible for them. So if you're looking for unprecedented access to the technologies shaping your future, Daily Planet is where you need to be.

MONDAY FEBRUARY 5 – FRIDAY FEBRUARY 9 AT 7P ET

Discovery

It's the inventive spirit that keeps our world moving forward, our society inspired, and our lives full of meaning. For Invent This! Week, Daily Planet travels the globe and takes you inside both top-secret labs and busted up garages – because innovation comes from everywhere. From mega projects to backyard D-I-Y creations, this week is overflowing with ingenuity and creative audacity. Get ready to meet the individuals brave enough to turn their wild ideas into reality no matter what it takes.

MONDAY MARCH 5 – FRIDAY MARCH 9 AT 7P ET

Discovery

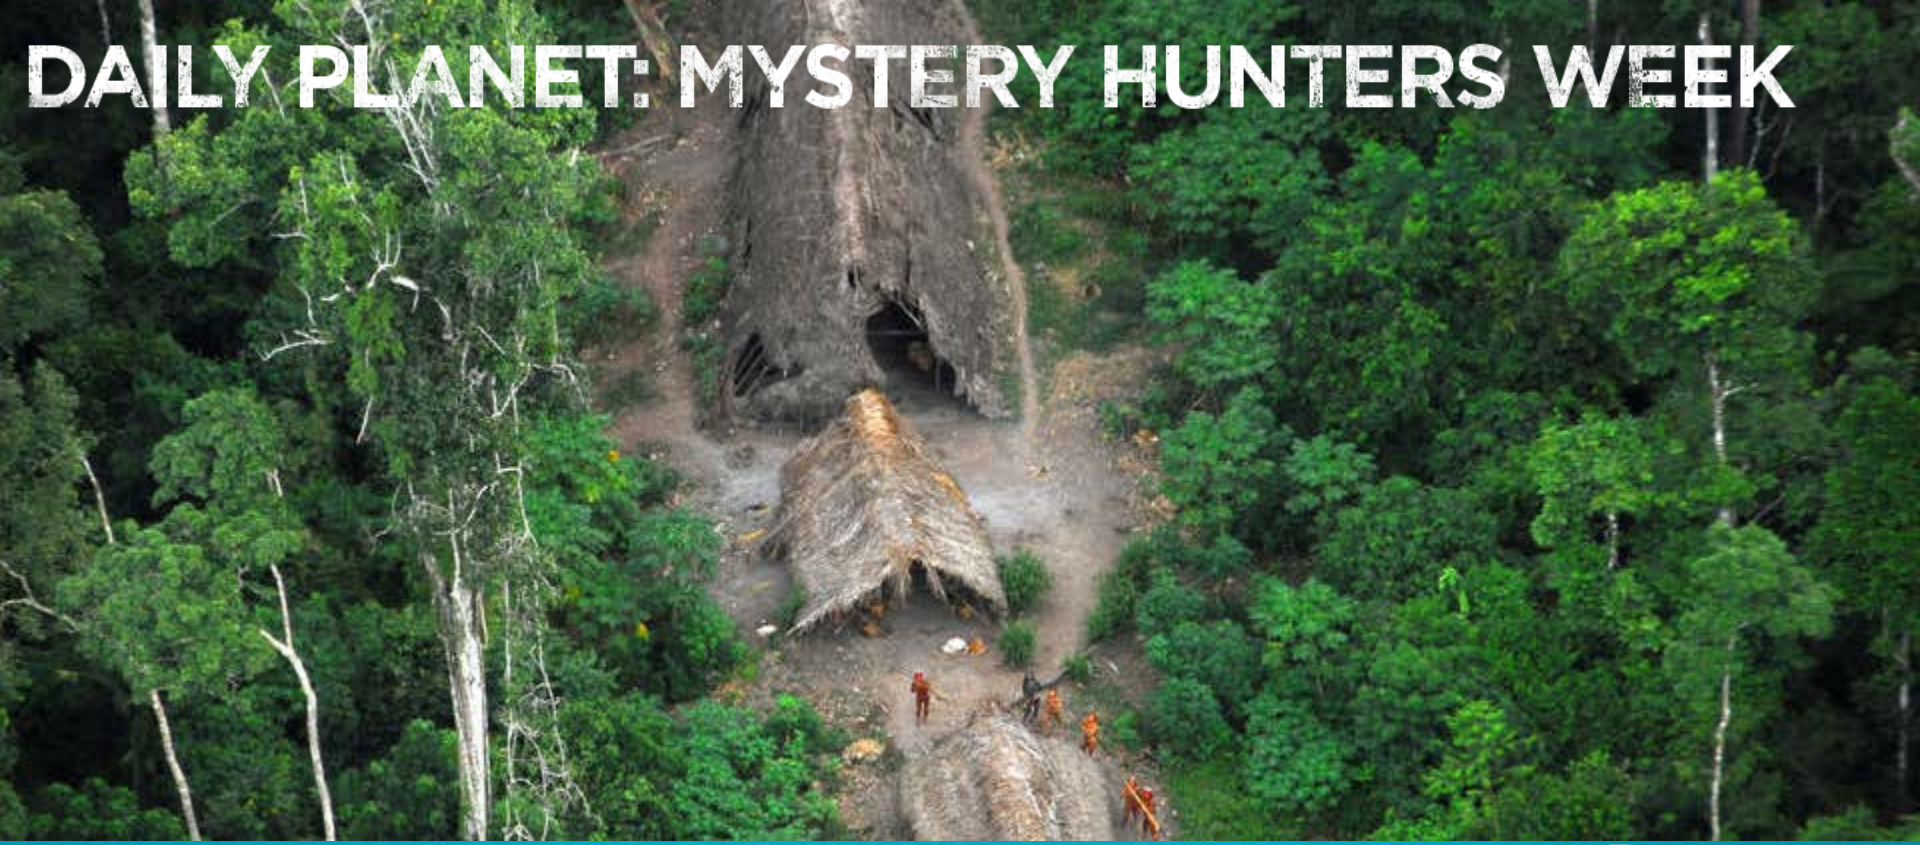

“Bigger is better”. At this point, the saying is a bit cliché, but Daily Planet is embracing it, and living life on a truly massive scale. We’ve tracked down the most over-the-top, gargantuan things you can imagine - like an eight and a half metre long golf club. You’ll want to be there when we yell, “fore!” But this week isn’t all fun and games. Daily Planet will also take you to Africa where 500 elephants are on the move. The survival of the species is on the line and in your hands. From monster-sized spectacles to scaled-up experiments, prepare to be left speechless with the enormity of what we’ve found.

MONDAY APRIL 2 – FRIDAY APRIL 6 AT 7P ET

Discovery

Let's cast an eye to the future. It's a magical place where the skies are filled with flying taxis and reusable rockets. Meanwhile, on ground level, the roads have been taken over by driverless-cars and high-speed transport trucks. But if that's still too much traffic for you, drop down a little lower – and hitch a ride on a conveyor belt built by tech billionaire, Elon Musk. If you're going to be driving, flying or kicking back in it, Daily Planet will let you take it for a test drive – decades before anyone else.

Unexplained and unexplored no longer… Daily Planet is on the case. How do the world's top crash investigators figure out what went wrong? Are aliens living among us? Are there parts of this world still completely hidden from view? Your biggest questions will be answered by the world's greatest minds. So take that Sherlock Holmes movie out of your Netflix cue. Truth is always better than fiction.
